

Diogo Araujo Wernek

Full-Stack Developer Node.js & React | TypeScript

wernek.dioggo@gmail.com (15) 99767-6890 LinkedIn: Diogo Wernek GitHub: Wernek

SUMMARY

Full-Stack Developer with experience in Node.js, Nest.js, React.js and TypeScript, building and maintaining high-criticality SaaS systems end-to-end. Experience in REST APIs, back-end architecture, service integration, and development of high-performance interfaces. Proven track record of impact, having optimized the processing of 900 thousand records with an 87% performance gain (40s → 5s). Solid practices in Clean Code, automated testing, and code reviews. Continuously expanding skills in Docker, CI/CD, MySQL, and MongoDB.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Node.js & React

Oct/2024 – Present

Sudeste Online - Specialist in Chemical Product Legislation

Full-Stack Developer Node.js & React

Oct/2024 – Present

AgroReceita - Intelligent Agronomic Prescription System (SaaS)

Developed and maintained REST APIs in Node.js / Nest.js and interfaces in React.js for the issuance and management of regulatory documents.

- Automated SDS (Safety Data Sheet) issuance pipelines, reducing manual steps and increasing process reliability.
- Refactored legacy back-end and front-end modules with a focus on Clean Code, maintainability, and separation of concerns.
- Optimized the performance of critical functions through improvements in queries, business logic, and component rendering.
- Implemented automated tests and development standards, facilitating code reviews and reducing regressions.
- Developed new end-to-end features in Node.js, TypeScript, and React.js, within a full-stack architecture with REST APIs.
- Implemented transaction control in a SaaS environment, ensuring data integrity and security between front-end and back-end.
- Refactored critical back-end and front-end sections, applying Clean Code and design patterns.
- Optimized the processing of 900 thousand records on the back-end and their rendering on the front-end, reducing the time from 40s to 5s (≈ 87% performance improvement).
- Improved queries in the relational database (MySQL), directly impacting product scalability.
- Used TailwindCSS to build responsive and consistent interfaces.

Development with Artificial Intelligence

2024 - Present

Applied use of AI in the full-stack development workflow

- Participated in code reviews, raising the team's technical quality and promoting good development practices.
- Use Claude Code (CLI) as a central tool in the development cycle, accelerating back-end and front-end delivery with AI-assisted code generation and intelligent refactoring.
- Apply Claude for code review, technical documentation, debugging, and architectural decision-making in both layers of the application.
- Configure and use MCPs (Model Context Protocol) to integrate AI agents into project contexts and external tools.

- Develop workflows with AI Agents and Skills in Claude Code to automate repetitive tasks and development workflows.
- Combine N8N with generative AI to build intelligent end-to-end automations, integrating systems and eliminating manual processes.

TECHNICAL SKILLS

Backend: Node.js, Nest.js, TypeScript, REST APIs, Python

Frontend: React.js, React Native, TypeScript, TailwindCSS

Database: PostgreSQL, MongoDB, MySQL

Quality & DevOps: Automated Testing, Jest, CI/CD, Docker, Clean Code

Automation & Others: N8N, API Integration, SaaS, Intermediate English

AI & Tools: Claude Code, Claude MCP, AI Agents, Skills, N8N + AI

EDUCATION

Systems Analysis and Development <i>Fatec Itapetininga</i>	Jan/2023 – Dec/2025
--	----------------------------

Administrative Technician <i>Etec Darcy Pereira de Moraes</i>	Jan/2020 – Dec/2022
---	----------------------------

CERTIFICATIONS & ACHIEVEMENTS

Full Stack Certificate - RocketSeat (181h)	Jun/2025
---	-----------------

N8N Automation Certificate - RocketSeat	Sep/2025
--	-----------------

2nd Place - 17th MIT Fatec Itapetininga <i>Project: Med Ação - Hospital Ticketing System</i>	Jun/2024
--	-----------------

Participation - 18th MIT Fatec Itapetininga <i>Project: Glowhub - Aesthetic Services Center</i>	May/2025
---	-----------------
